

Recruit Training Center

This sufficiency economy Center was established in 22nd May 2007 by the Recruit Training Center, Royal Thai Navy. In 2007, Royal Thai Navy willingly responded to the government policy called “Sufficiency Economy for Naval Life of Celebration in Honor of HM The King on 80 birthday anniversary, December 5, 2007. As a result, the Navy arranged Recruit Training Center conducted “Study New Theory Center” to be a center of the knowledge and be a medium to deliver all understanding of the theory to all navies, all private and public sectors, students, along with other people. Also, the aim of this project only increases attitude and gratitude about the King and offers the chance to all people who interest in this scheme to practice this project to improve their life practically.

The recruit training center had built the learning center of the new theory for learning of philosophy of sufficiency economy, and new theory follows teaching of The King Bhumibol Adulyadej and from knowledge had got and process above their life practically.

Exciting activities in the learning center include soil houses, vermicomposting factory, floating garden, saving energy house, organic farming, and animal husbandry systems.

More, the center has built the king's gallery to celebrate His Majesty the King Honor Celebration on the King's birthday anniversary, December 5, 2011. The gallery collects 84 pictures of the King's imageries, biography, and royal duties since seven years old until now to increase his honor and supremacy. To allow the public; Ministry of Defense, both private and government agencies, troops and their families, students and other people to be informed about the King's biography and all about royal duties.

Warin Fruit Farm

Mr. Warin Chitapanya is an outstanding gardener from Rayong province who is well-known to be a pioneer of growing a commercial mango production calls R2E2 in 1989. Mr. Warin at 73 years old who has already won an award of the National dominant farmer has an adaptable personality. In the past, he grew various kinds of commercial fruit such as lemon, coconut, and cassava but did not hesitate to get rid of it when the price was down. In 2000, he was invited by the government of Burma for a field trip and was eye-catching with a species of jujube calls "Super jumbo jujube." Then, he brought it to his farm and started breeding it with his style to become the most delicious one.

Nowadays, his mango and jujube production is not enough for a tremendous demand and need to make a reservation for your first grab not only because of the taste of them but also his organic farming system by using biofertilizers and sustainable management.
